Pebble Stone Tile

Pebbles are made from small stones that are ingeniously arranged then glued to a mesh backing. Each one is laid out in a way that gives you seamless joins. They are ideal for pebble flooring, pebble stone tile, pathways, fountains, wet areas and for decor features, both indoors and outdoors. Pebble flooring is fireproof, need little maintenance and no paint. It imparts classic European elegance to paved areas with its old world design. Pebble flooring offer designers, architects and builders unlimited design possibilities. The nostalgic, natural stone look in rectangular and square pavers can be used in various combinations to obtain an array of exciting designs, ideal for residential and commercial applications.
